

# **DON'T GIVE THE GIFT OF OCCUPATION! DON'T BUY HEWLETT PACKARD. WHY?**

Hewlett Packard (HP) provides and operates much of the technological infrastructure that Israel uses to maintain its system of apartheid, settler colonialism, and occupation over the Palestinian people.

HP Enterprise is the prime contractor of the Basel system, an automated biometric access control system employed within Israel's checkpoints and apartheid wall. The ID cards form the basis of Israel's systematic discrimination against Palestinians. HP technology helps the Israeli navy enforce the siege on Gaza.

In Palestine, HP companies provide imaging for Israel's apartheid checkpoints and ID cards system; enable Israel's deadly blockade of the Gaza Strip; provide services to illegal Israeli settlements; and manage people for profit in Israeli prisons where torture is systematic. While claiming to uphold values of social responsibility, HP companies are notorious for involvement in oppressive practices worldwide, such as providing technology to enable deportations, mass incarceration, and solitary confinement.

Hewlett Packard enables  
Israel's mass detention and  
imprisonment of  
Palestinians

## Hewlett Packard enables racial segregation at Israel's checkpoints

More than 1.8 million people have signed a petition calling on HP to end its role in Israeli apartheid, settler colonialism, and occupation. Canada is part of an active global campaign against HP. Join the campaign and **Boycott Hewlett Packard**.
